mohamed.kelany@kit.edu

Date and Location: Tuesday, 9:45 - 11:15 h (usually lecture), EAS-Hörsaal, Building 11.10
Wednesday, 8:00 – 9:30 h (usually tutorial), NTI-Hörsaal, Building 30.10

Materials: Slides, lecture notes and problem sets will be available through KIT's digital teaching platform ILIAS (<https://ilias.studium.kit.edu/>).

Examination:

- Oral; duration approx. 20 minutes
- Dates on appointment; ask at IPQ's office for available time slots (Building 30.10, Room 3.44, office@ipq.kit.edu); registration online.
- **Bonus system:** During the term, three problem sets will be collected in the tutorial without prior announcement and graded. If more than 70% of each of these problem sets was solved correctly, your oral examination grade will be upgraded by a bonus of 0.3 or 0.4 (except for the grades of 1.0, and 4.7 or worse). Please always submit your solutions over the link provided in the folder "04_Problem_Sets" within the NLO ILIAS page before the respective tutorial starts. In this folder, you will find all problem sets, the link to upload your solution **by the respective deadline**, and the solutions appearing after the deadline. Please merge all pages into a single pdf file, and please use a scanner. Smartphone made snapshots are often illegible, and in that case your solutions can not be graded. In case there are any technical difficulties with ILIAS, you may also submit your solutions by e-mail to nlo@ipq.kit.edu before the respective tutorial starts.

Semester plan: Subject to modifications, which will be announced in the lecture or in the tutorial.
